

# CHILDHOOD IMMUNIZATION IN AN ALBERTA FIRST NATIONS COMMUNITY: AN INSTITUTIONAL ETHNOGRAPHY OF NURSE IMMUNIZERS

Bonny Graham, BScN, RN  
Director of Nursing,  
Maskwacis Health Services

Shannon MacDonald, PhD, RN  
Assistant Professor,  
Faculty of Nursing, University of Alberta

FINCH

First Nations Childhood  
Immunization Project

# DISCLOSURE STATEMENT

We have no affiliation (financial or otherwise) with a pharmaceutical, medical device or communications organization.

# LAND ACKNOWLEDGEMENT

# OBJECTIVES OF TODAY'S PRESENTATION

1. Provide context/setting for the project
2. Describe institutional ethnography approach
3. Present preliminary findings of the study

# MASKWACIS HEALTH SERVICES

- Maskwacis Health provides comprehensive service to all 4 Nations
- Main Health Centre in Ermineskin + 3 satellites including Pigeon Lake

# Main health centre

# Satellite health centres

# IMPETUS FOR THE PROJECT

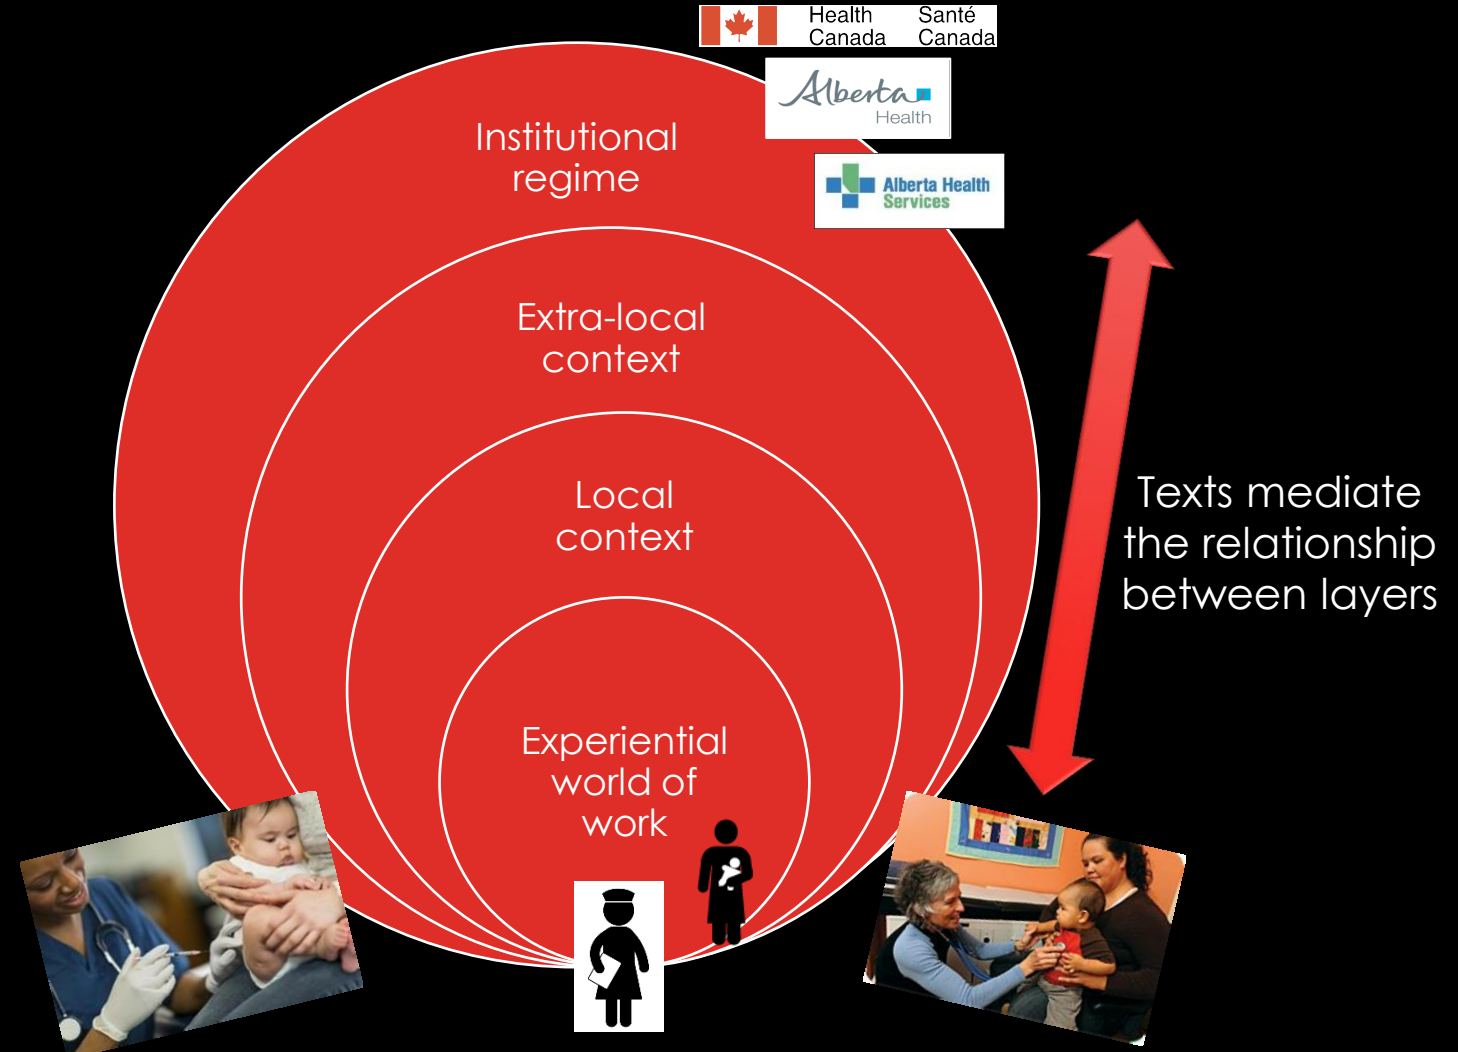

## Immunization Coverage at Age 2 Years, First Nations in Alberta and province of Alberta

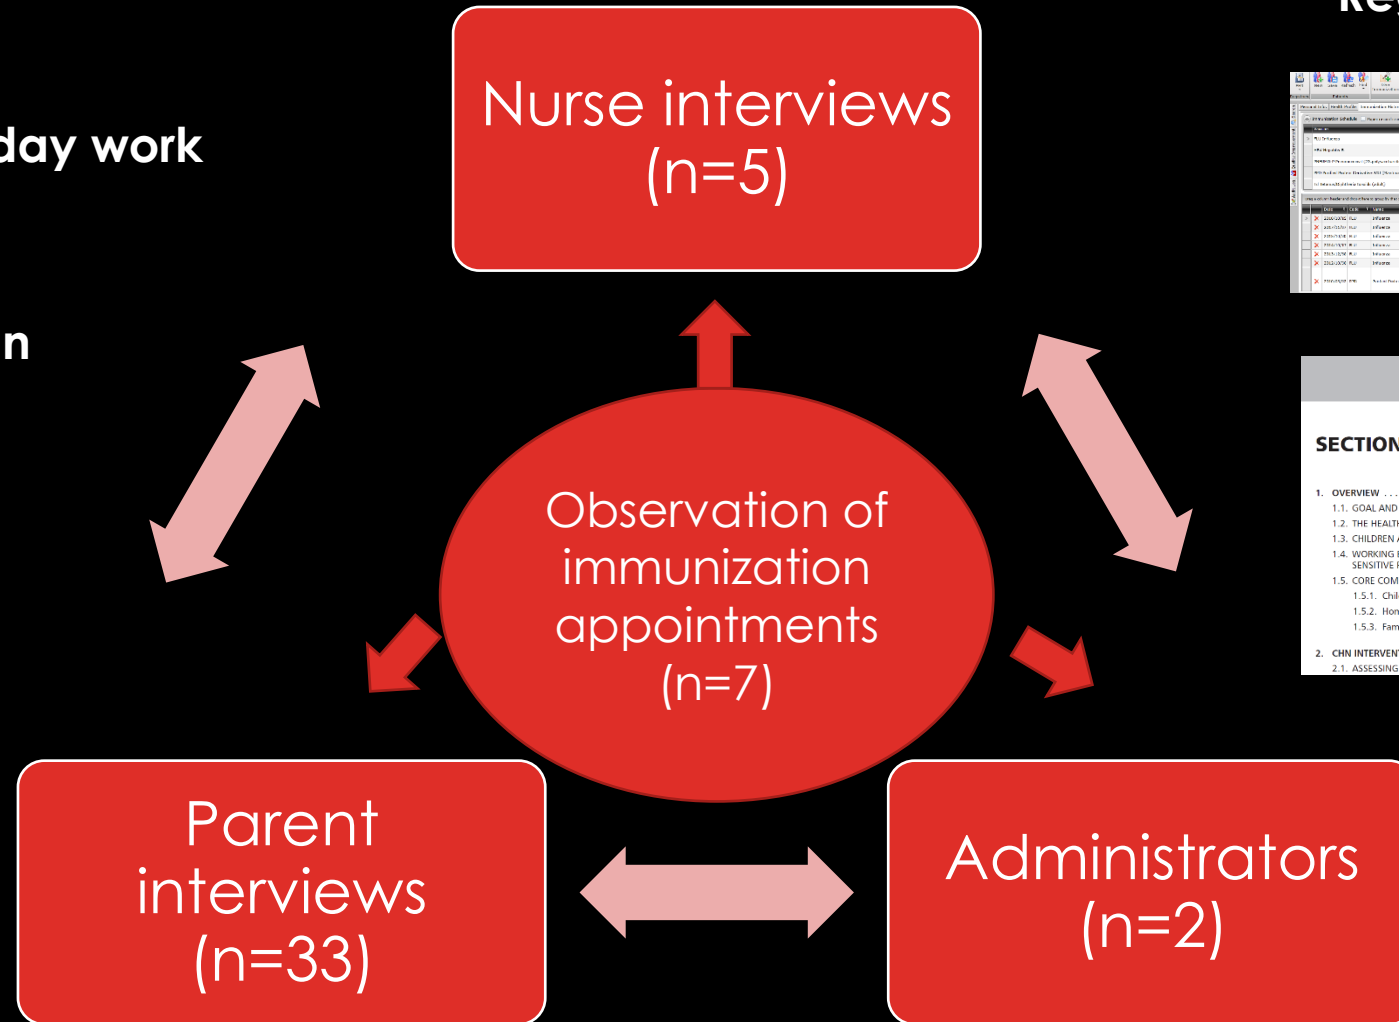

# METHODS: INSTITUTIONAL ETHNOGRAPHY

“IE seeks to empower participants, rather than just understand them, as a lack of understanding about how one is socially organized is considered a form of domination. In essence, people’s experiences reveal something about whose interests are being served and therefore reveal issues of power”.

(Campbell & Gregor, 2002)” (in Sarter Huel, 2018)

- Began with the everyday work of nurses
- Data collection was an iterative process

2. CHN INTERVENTIONS/STRATEGIES .....	10
2.1. ASSESSING GROWTH AND DEVELOPMENT .....	10

# FINDINGS

## Institutionally Authorized Version of Events

Before Booked  
Appointment

During  
Appointment

After  
Appointment

# VISIBLE VERSUS INVISIBLE WORK

## Visible Work

(text implicated in process)

- Routine work
- What is used to hold nurses accountable
- What ends up in documents

## Invisible Work

(text not implicated in process)

- Unexpected work
- What is not part of the 'authorized' work – good nursing, but not recognized
- What gets done but does not get recorded

# BEFORE BOOKED APPOINTMENTS

## Visible Work

- Nurse receives appointment sheet with name, DOB, PHN
- Nurse accesses immunization records

## Invisible Work

- Checking for incorrect DOB/PHN, children have similar names, checking off-reserve records
- Work that happens when Internet is disrupted

# DURING APPOINTMENT: PART 1

## Visible Work

- Child who is scheduled, arrives with parent(s) and appointment proceeds

## Invisible Work

- 'No show'
- Late arrival
- Multiple children come to appointment and nurse must decide whether to vaccinate them all and/or how to manage them

# DURING APPOINTMENT: PART 1

Multiple children come to appointment and nurse must decide whether to vaccinate them all and/or how to manage them..

“When there’s more than one child, I usually ask if there is a partner or somebody that had come with them to decrease the risk of making mistakes. We really shouldn’t have more than three people in the room – unless that extra person is there, caregiving for other children. Otherwise, it gets pretty chaotic when you have several busy kids in the room....But it’s the window of opportunity to immunize those other kids.”

- Nurse

# DURING APPOINTMENT: PART 2

## Visible Work

- Consent received from parent

## Invisible Work

- A child in care: Figuring out if person in front of you has the authority to provide consent and if not, calling the parent and/or Children's Services to see if you can get delegation of authority

# AFTER APPOINTMENT

## Visible Work

- Charting

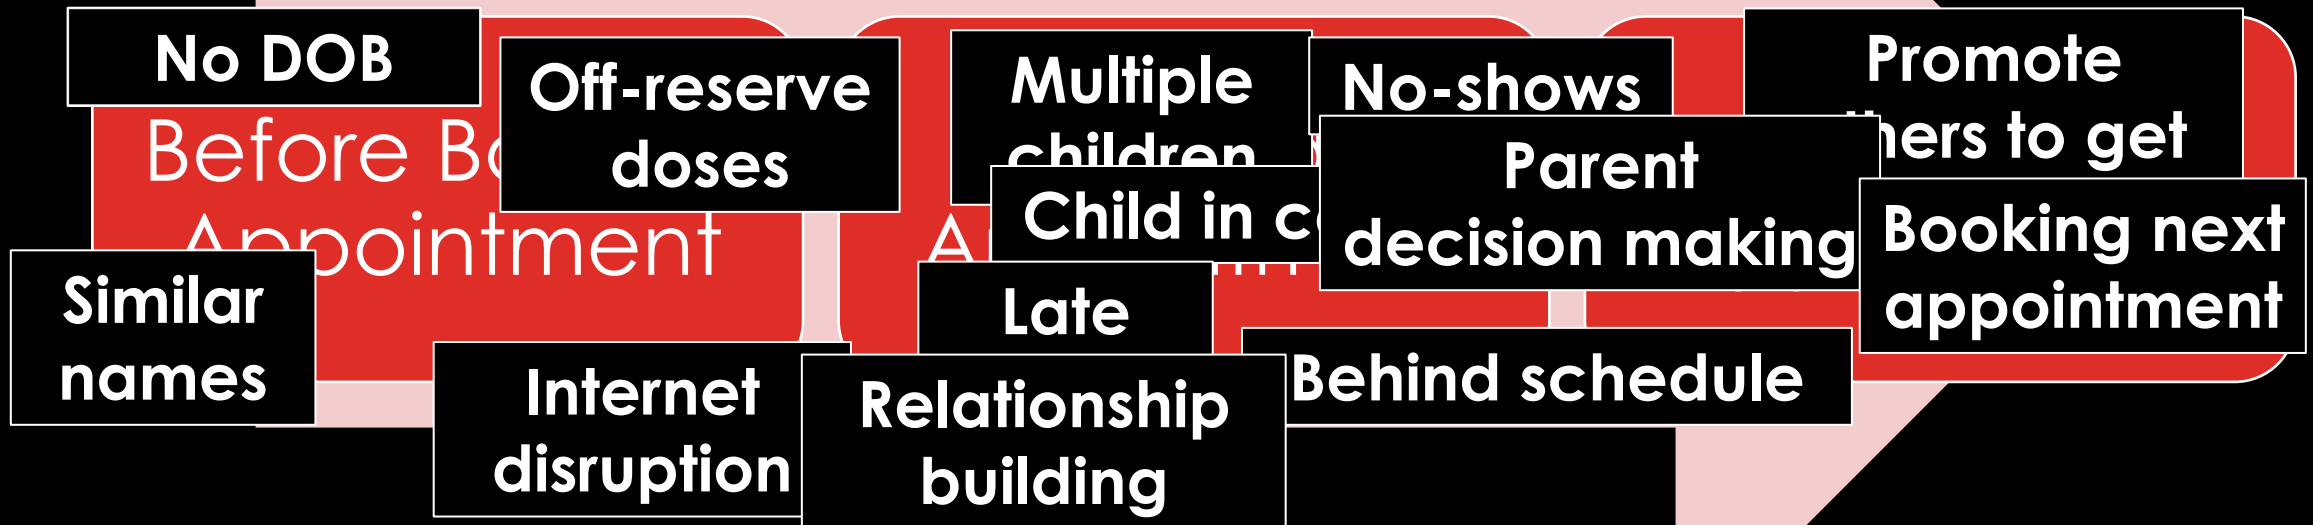

## Invisible Work

- Walk family out and make sure they book in for their next appointment
- Encourage other family members to come in for their vaccinations

# SUMMARY

## Actual Version of Events

# CONCLUSION

THE POPULAR DISCOURSE IS THAT:

**This project challenges that narrative by starting at the everyday work of nurses and showing the complexities of providing, and accessing, immunizations**

# THANKS TO OUR COLLABORATORS & PARTNERS
